

1. What is it?

Ahead is a completely online program that can produce zooming presentations, portfolios and websites that includes any type of media. It is free on a limited basis. It is \$10 a month to have complete access to all of the tools.

2. URL

<http://ahead.com/#view/lilaspaces/main/welcome?scene=HOME>

3. What are some key elements on the tool?

The free version of Ahead is minimal, but it does allow you to have as many spaces (pages) as you want. You can upload images, videos and other graphics. In addition, you can add links to other spaces or websites. You can add text and organize the presentation in the order that you want. You can do basic changes to the background as well.

4. How can it be used in education?

Ahead can be used by teachers and students. Teachers can create interactive and interesting presentations that can be structured or exploratory. Students can create their own portfolios, presentations or pages based on preference or as an assignment.

5. What approach is it best used for?

This program would best be used in a constructivist's classroom. It is a highly exploratory program and leaves a lot of room for creativity. It can be used as a way for students to present learning or as an assignment. I think it most fits the constructivist's view; however I see the potential of it being used in an objectivist's classroom it utilized as maybe a highly structured assignment with specific models and instructions for completing the project.
