

Mini-Assignment 2

Jennifer Emfinger

Digital Photography

I used Picnik.com to edit all of my photos.

This is my original picture. I was hiking with my husband in the Frog Bayou area.

I used the cropping tool in Basic Edits on the Picnik's website. I chose to crop out most of the background to focus on the most important object...ME! 😊

Again I used Picnik's
Black and White
editing tool within the
Effects tab.

As with my two previous
photographs, I used Picnik.com to
make changes. With my final edit, I
first went under the Effects tab.
There I used the editing tool titled
Gooify. I “gooified” all of the
surrounding area outside of my face
and body. Next, I used the
Crystalize option under the Effects
tab. Then I went to Fancy Focus
and only focused on my face. Finally
I went to the Seasonal tab and
found the Valentine holiday edit
options. I chose to have a Tasty
Frame around my picture.
